Ambre 9100  
Sit Stand Chair

## DESCRIPTION

The Ambre 9100 is an ergonomic, modular chair that rises and reclines, and therefore easy to prescribe for individual requirements. The electric height adjustment provides an excellent support, especially lumbar support for the user when standing up from a seated position. A compact modern design for an electric sit stand chair. Fully adjustable to meet all needs of the user.

Enabling users to build a chair to their exact requirements, a chair to complete daily tasks but also to relax in with some down time. Our chairs can be built to match that of a riser recliner chair, giving you the ability to sit back and relax after finishing the cooking, cleaning and many other daily living needs. Our seat angles can be chosen to help with standing, such as a sit stand chair, but also recline backwards with the electric backrest function that can be added to the chair.

## FEATURES

- Backrest
- Adjustable armrests
- Electric or manual: rise and recline
- Lifting range of 20 cm (or 14 cm). Electric 28 cm (or 20 cm).
- Frame
- Brake lever
- Footrest available
- 10cm Castors

## MOVING AROUND

### HELP WITH STANDING UP

The Ambre 9100 (electric) provides outstanding support when moving from a seated to a standing position, which is essential for people with weakened muscles. Electric height adjustment, combined with gas spring-controlled seat angle beneath the armrest, allows the user to move to a standing position with ease.

### ELECTRIC BRAKE

If the user is unable to lock the brake manually, an electric brake function is an outstanding optional extra. It's applied using a button on the armrest. The electric brake is available as an optional extra for both manual and electric Ambre 9100 versions.
